

MuleSoft OpenTelemetry Capabilities and Data Residency

Legend:

1 - Runtime Plane to Anypoint Monitoring Application Log Feed. Can be disabled per Application.

2 - Runtime Plane to Anypoint Monitoring OTEL Exporter Feed. Traces Only. Need to explicitly enable Traces per Application. Will not export if 3 or 4 enabled.

3 - Runtime Plane to Customer Managed OTEL Collector direct Application Logs and Traces Feed. Need to explicitly enable through Application Properties. Recommended for scalability and extensibility.

4 - Runtime Plane to SaaS OTLP Endpoint direct Application Logs and Traces Feed. Need to explicitly enable through Application Properties. Not recommended for scalability and extensibility.

5 - OTEL Exporter in Control Plane to SaaS OTLP Endpoint Traces and Audit Log Feed. Need to explicitly configure and enable. No support to export Application Logs

6 - Customer Managed OTEL Collector to SaaS Ingestion Endpoint direct Application Logs and Traces Feed. Supports custom exporters for extesibility.
